

Variations in color and surface are to be expected when purchasing a hand-finished design. No two pieces will be an exact match.

Terms & Conditions

Hand-Finished Pieces

All furniture is finished individually by hand in our factory by experienced artisans. Carved work, weathering, and leafing techniques are also done by hand. No two pieces will be an exact match.

Natural Variations in Wood

Our wood case goods vary in grain and density which may make the same stain vary from piece to piece. Wood is a product of nature. Slight tears, knots, and differences in color are typical genuine trademarks of nature and add to the beauty of wood. Slight differences in wood, veneer, and grain patterns are natural. OBD wood finishes are species specific. Our standard wood is Maple. If a design is made in one of our premium wood species, the finish must be selected from our finishes for that species only. Ex. Walnut & Oak.

Custom Finishes

All custom finishes must be pre-approved and prepaid by the customer. Custom finish strike offs are \$150.00. Exact matches are not guaranteed.

Finish Samples for Production

OBD finishes are multilayered and hand-applied. slight variations are to be expected. OBD does not accept finish samples to match that are more than two (2) years old. Please request a current sample and return the sample once approved so the artisans may match your approved sample.

The factory reserves the right to make changes to or discontinue a color at its own discretion and without any prior notification. If an approved sample is not returned with an order, OBD's professional artisans will finish the furniture based on the factory's standard stepboards.

Care & Cleaning

Standard Finishes & Stains

Wipe surfaces with a damp cotton cloth and then wipe dry. Water and alcohol spots must be removed quickly. Strong stain removers or solvents are not recommended as they may destroy furniture finishes.

Leafed Finish Care

Our Leaf finishes are achieved using thin metal sheets applied by American hands and carry a high value. They are the most refined and fragile. There is an upcharge based on the complexity of the application and additional artistry required. These are pictured with painted alternatives which are good options for high traffic furniture designs. Carefully wipe surfaces with a soft cotton cloth and thoroughly wipe dry. Do not allow moisture to accumulate on the leaf surfaces. Solvents or rough treatment will destroy these delicate finishes. If the top coat is pierced and compromised, the metals will tarnish.

Each Old Biscayne Finish
Is The Final Signature
Of A Unique Original Design.
